

PPO Plan with Independent TPA

We believe businesses and employees deserve to have a health plan that is designed to align with their unique needs and interests. That's why we now offer a PPO plan alternative that pairs traditional network access with the benefits of an independent TPA, enabling unmatched customization and member experience.

Why the Imagine360 PPO plan is unique

Unlike traditional PPO plans with guardrails and limited selections you must conform to, the Imagine360 PPO plan aligns with employers on what works best for employees and their families.

✓ Enhanced flexibility and customization

The Imagine360 PPO plan comes with the ability to create customized plan design and employer-specific service level agreements. Plus, employers have the flexibility to introduce new innovative ideas and programs, including integration with their preferred third-party services.

✓ More personalized service

More focused attention and personalized service for HR and employees. We support members on every step of their healthcare journey. Responsive Imagine360 team members help find a physician, answer clinical questions, and handle billing issues.

"I will say everyone I have talked to at Imagine360 has been very helpful. You took the time to go over every concern I had and found a resolution. I wish every business I deal with had the same quality of customer care..." - T. Lane, Member

✓ Addressing underperforming network areas

Even in a national PPO network there may be scenarios where employees experience out-of-network challenges. Imagine360 brings strategies and services to address these access challenges head on. Where other plans leave members on their own to navigate out-of-network care, including higher costs, Imagine360 brings a reference-based pricing and direct contracting model that delivers high performance.
