

# Understanding Your Provider Options

Imagine360 makes sure you have access to care that meets your needs.

## Before Plan Effective Date

Before your plan starts on **January 1, 2026**, you can search for facilities and physicians by going to **[imagine360.com/providersearch](https://imagine360.com/providersearch)** or scanning the QR code.

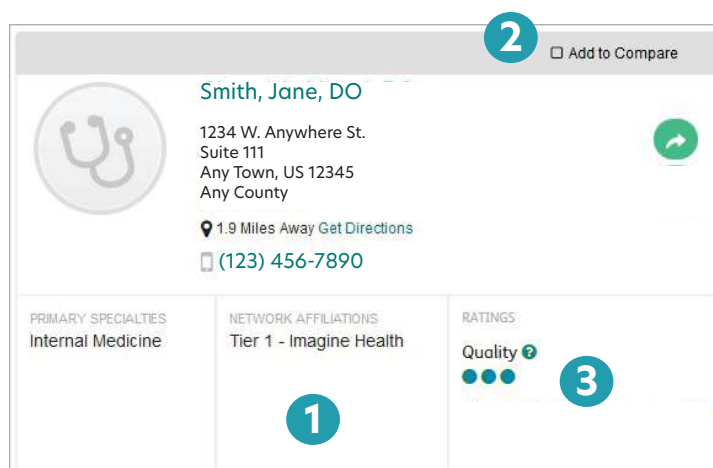

Then you'll enter this code to get started: **EBLNI**

You can search by name, specialty or location. Then you can:

- 1 View the provider's network affiliations.
- 2 Compare providers.
- 3 See a provider's quality rankings.

You can also call **1-844-BugBYTE** 30 days before your plan starts to see how a provider works with your plan. Reference your plan's group number: **H880309**

No matter where you choose to get care, you have the support of built-in price protection. That means we review claims to find billing errors and overcharges. The result? You only pay what's fair and reasonable for care.

## After Plan Effective Date

On your plan's effective date, you'll gain access to Imagine360's online benefits portal to find and compare providers, as well as get cost estimates. You'll also be able to contact us directly for personalized support, including help finding care and making appointments.

*Coverage under a member's plan may not be available for all provider types listed. Please verify benefits prior to receiving services. Confirmation of a physician's or facility's status is recommended as some providers may no longer participate and services could be covered at a different benefit level.*

It's more than a health plan.  
It's a promise.
