

Provider choice. Cost savings. Real support.

When you need care, you can choose top-rated providers that are right for you. And no matter who you see, your plan works to lower your costs. It's as easy as 1, 2, 3.

1

Your plan's built-in price protection means provider claims are paid on a fair price of care — not markups.

Meet Joe. What does he pay for a CT Scan?

	Traditional Health Plan	Imagine360
Plan Allows	\$1,582	\$279
Joe's Out-of-Pocket	\$1,582	\$279

Average Billed Cost of a CT Scan: \$3,164

2

Every provider claim is reviewed for errors and overcharges so you don't overpay.

After you receive care, your provider sends us a payment request (a claim). Every claim is reviewed to:

- ✓ Identify billing errors or any incorrect charges
- ✓ Limit provider charges to what your plan allows

Some providers receive a payment lower than what they billed. But most accept the plan's payment.

3

All you have to do is compare your Explanation of Benefits to your provider bill.

Occasionally, a provider may bill you for more than what you owe.

If they don't match, just call us at
844-BUGBYTE (284-2983)

We'll work with the provider for you so you don't pay more than what your plan says you owe — and keep you updated every step of the way.
